Atlanta, Georgia || Email: ketup2029@gmail.com || Phone: +1 9179627451

EDUCATION

New York Institute of Technology
Master of Science in Computer Science

Manhattan, New York
January 2021 - December 2022

Gujarat Technological University (L.J Institute of Engineering and Technology)
Bachelor of Engineering in Information Technology

Gujarat, India
June 2016 - August 2020

WORK EXPERIENCE

Software Associate at Aavis Pharmaceutical | Atlanta, Georgia

July 2024 - Present

- Implemented a JSON Schema using Typescript, resulting in a 70% reduction in developer's hours.
- Adapted the migration of the REST-based APIs to a cloud-based distributed system employing AWS EC2, AWS SQS and S3 Buckets, ensuring scalability and fault tolerance.
- Demonstrated ability to design and implement object hierarchies and inheritance structures using prototypes or ES6 classes, ensuring code reusability and minimizing duplication.
- Proficient in the end-to-end software development life cycle, encompassing requirement analysis, design, development, testing, deployment, and maintenance.
- Proficient in developing enterprise-level applications using J2EE technologies like Servlets, JSP, JMS, and JNDI.
- Streamlined deployment with 0 downtime using GitHub Actions CI/CD pipelines to ensure continuous availability.
- Experience in handling exceptions and error conditions using Java's exception handling mechanisms (try-catch-finally blocks, throw and throws keywords), ensuring robustness and reliability in Java applications.

Software Engineer at FeelTech Solutions Private Limited | Manhattan, New York

January 2023 - June 2024

- Demonstrated ability to refactor legacy codebases to adhere to SOLID principles, enhancing code maintainability, flexibility, and extensibility.
- Experience in implementing design patterns and architectural paradigms such as MVC (Model-View-Controller) and MVVM (Model-View-ViewModel) to achieve separation of concerns and maintainability in large-scale applications.
- Proficient in implementing object-oriented design patterns in JavaScript, utilizing concepts such as objects, classes, inheritance, and encapsulation to create scalable and maintainable codebases.
- Skilled in utilizing Java collections frameworks like ArrayList, HashMap, LinkedList and Generics to manage and manipulate collections of objects efficiently, enhancing code performance and readability.
- Utilized Git and GitHub for version control, collaborating with the development team for smooth integration.

Full Stack Developer at DesireInfoWeb | Gujarat, India

January 2018 - December 2020

- Developed robust software solutions using Java, ensuring scalability, data integrity, and cost optimization.
- Proficient in creating RESTful APIs and communication protocols for seamless interaction between microservices.
- Skilled in working with NoSQL databases such as MongoDB and DynamoDB for efficient data storage and retrieval.
- Experienced in using Spring Boot's ORM (Object-Relational Mapping) support, such as Hibernate or JPA, for seamless database interaction.
- Proficient in Agile methodologies such as Scrum and Kanban emphasizing customer-focused delivery.
- Experienced in designing and deploying applications on cloud platforms using services like EC2, S3, and Lambda.
- Experienced in continuous integration and deployment (CI/CD) processes with Spring Boot applications using tools like Jenkins or Travis CI.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript.
Web Programming:	HTML, CSS, Bootstrap, ReactJS, Angular, Node.js, JSON, JSP, jQuery.
Tools:	NetBeans, Eclipse, Microsoft Visual Studio, GitHub, Rhino, ANTLR, Docker.
Databases:	MySQL, MongoDB, Oracle.
Visualization:	Streamlit, NumPy, Matplotlib, Pandas.
Cloud Platforms:	Microsoft Azure, Amazon Web Services.

PROJECTS

Pulse Oximeter Tracking Research Project | New York Institute of Technology

- Developed an AWS-based pulse oximeter tracker for the College of Osteopathic Medicine at NYIT.
- Collaborated with medical students to create a solution for tracking user's pulse data, improving medical diagnoses and treatment plans while demonstrating Data visualization skills.
- Successfully deployed, the solution enabled real-time pulse data monitoring for multiple users, providing more comprehensive and accurate information for medical research advancements.

Online Course Portal

- Created a responsive online course platform featuring user-centric design principles; the portal's launch resulted in a 30% increase in course sign-ups, validating the effectiveness of targeted UX enhancements.
- Implemented a robust backend system with secure payment processing, ensuring a seamless and safe experience for over 10,000 users.
